THINGS  
ARE  
HAPPENING  
HERE**

**m  modal**

**August 2019**

## M\*Modal

offers **cloud-based**, front-end medical speech recognition solutions for **all medical specialties** to **accurately** and **quickly** document directly in over 200 compatible EHRs. An **integrated** suite of **speech recognition** solutions to help physicians create **higher quality** documentation more efficiently.

Compatible with EHRs such as: Epic, Cerner, athenahealth, MEDITECH, Allscripts...

# The Solution

An integrated suite of speech recognition solutions to help physicians create higher quality documentation more efficiently. Solutions include:

- Fluency Direct (FD)
- Fluency for Transcription (FFT)

## **Fluency Direct**

Front-end speech recognition via USB  
Microphone or Mobile App Microphone

## **Fluency for Transcription**

Back-end dictation and transcription via telephone

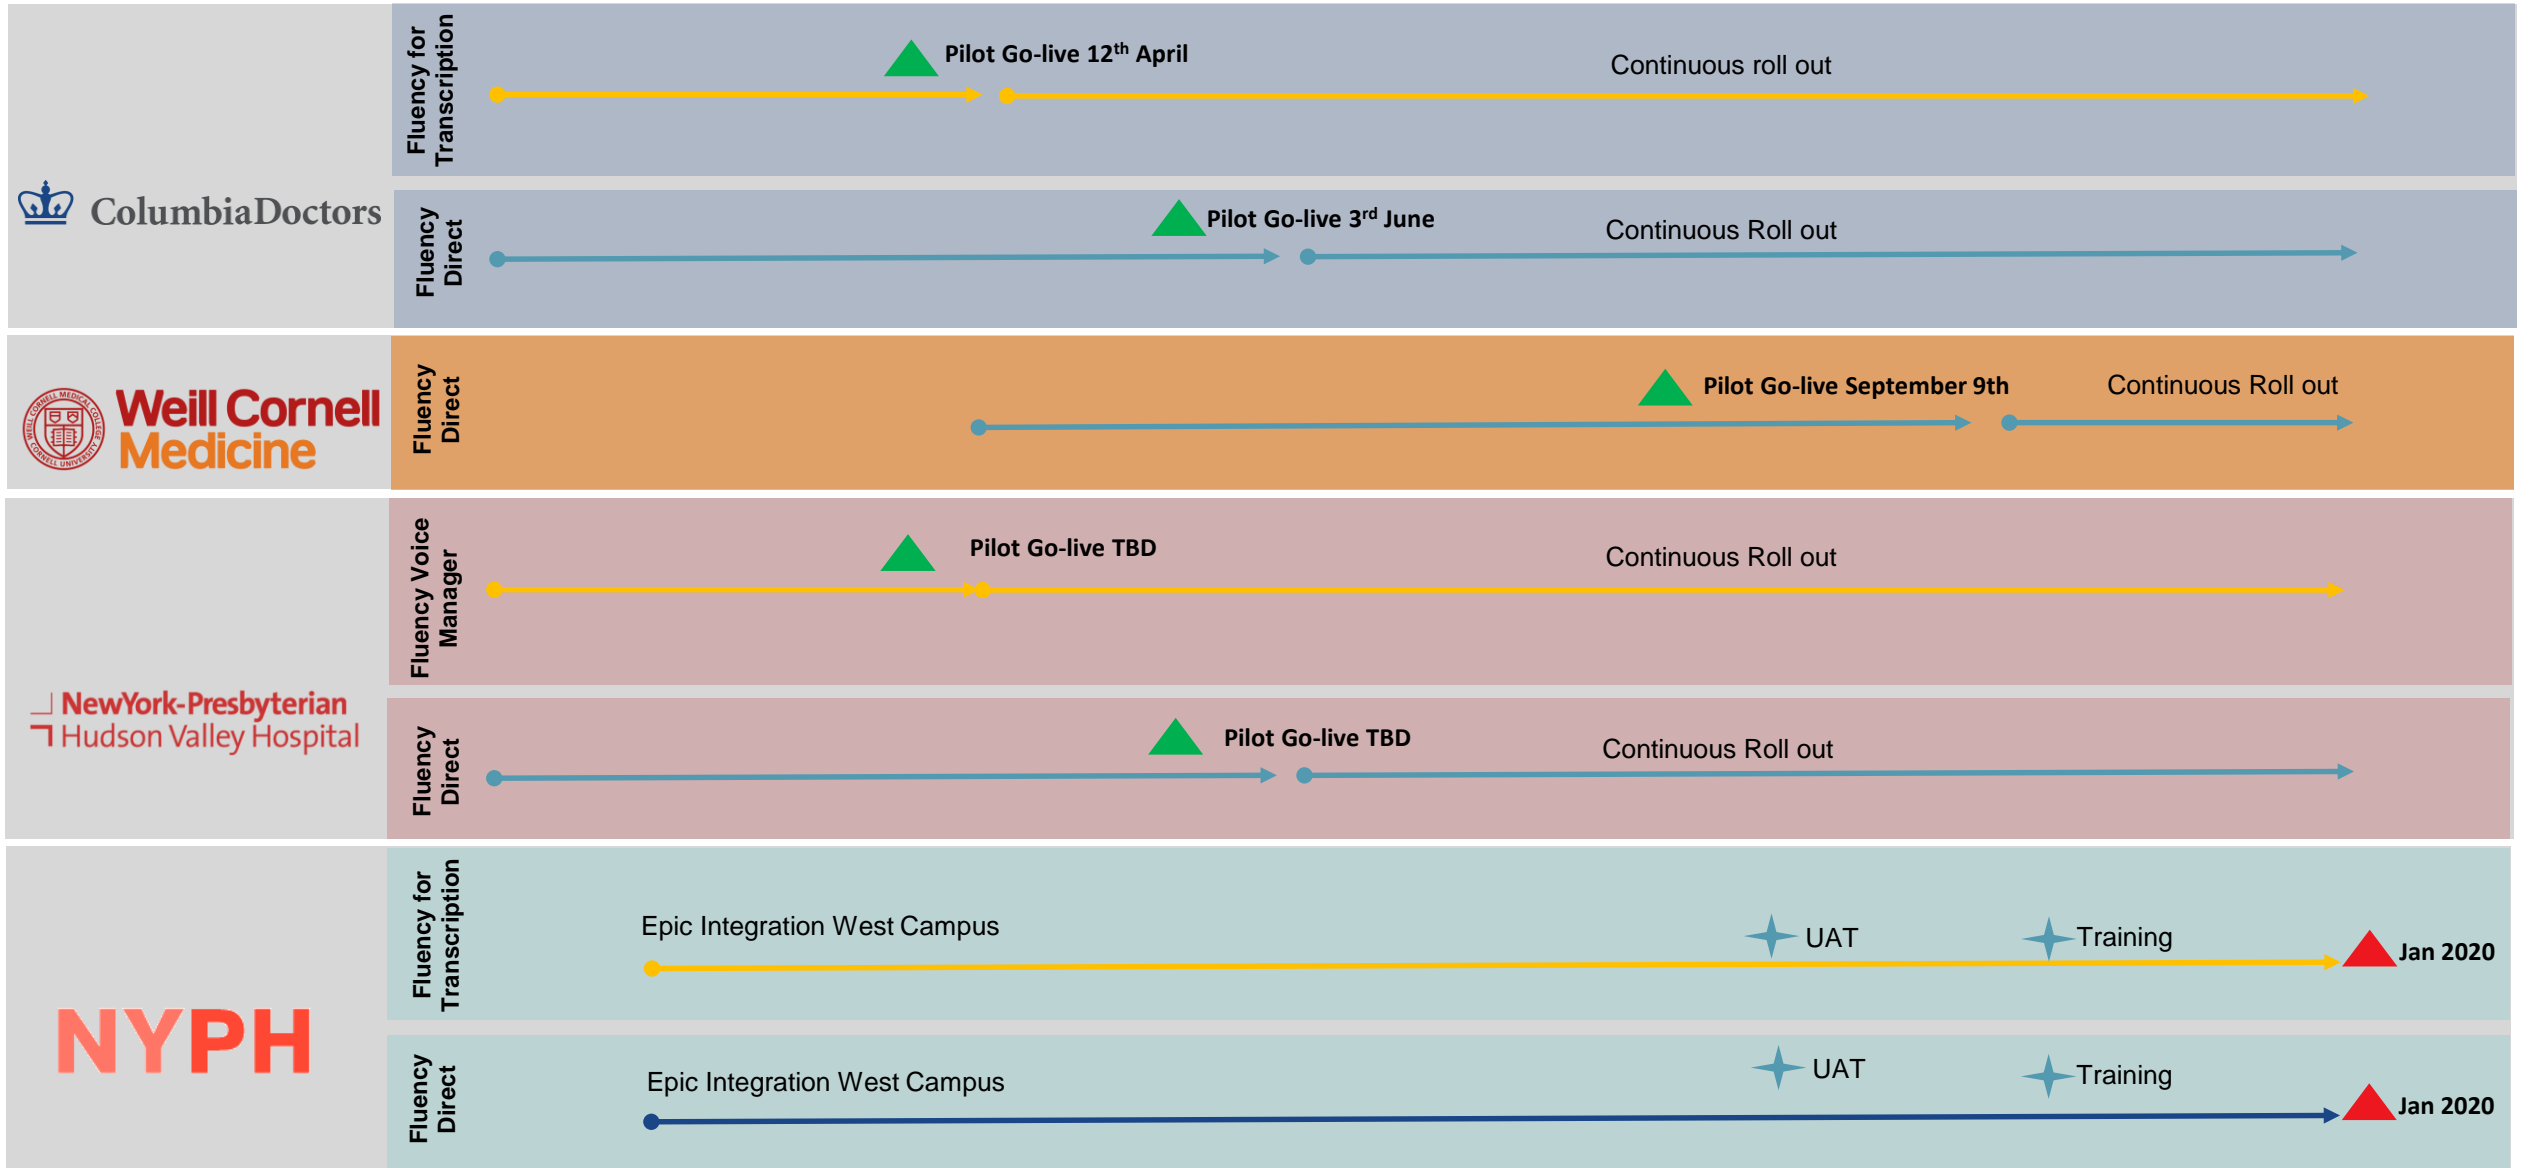

## Benefits

The solution will allow physicians to create and update clinical documentation using different speech options, all with the same cloud-hosted user profile on a single speech platform shared across applications, workflows and devices.

Other benefits include:

- Robust analytics and reporting
- Centralized workflow management
- Flexible dictation options
